Seville Animal Hospital takes all precautions inside the hospital to provide an environment free of external parasites, such as fleas. Bedding is frequently washed, floors are frequently bleached and we strongly recommend each pet be treated with a monthly flea control. However, there are some months when fleas outside are unavoidable and may jump on your pet. For additional protection against flea infestation, when you pick up your pet we can administer a pill that will kill any flea on your pet within 30 minutes. This pill can be administered upon discharge of your pet and begin working before you return home. Cost is ~ \$5.32 **Client Please Initial:** Yes _____ No _____ For Staff Use Only: Size administered? 2-25lb or 25 & over Upon admission to our hospital, animals infested with fleas will be given a Capstar pill to help aid in the fight against infestation to their surrounding neighbors. This additional charge will be added to the bill when the pet is picked up. For Staff Use Only: Size administered? 2-25 or 25 & over
